EXECUTIVE SUMMARY

Full-Stack Developer *working primarily with* ***Node.js, React, and TypeScript****. My background includes building APIs and interfaces for neuroscience research and international SaaS platforms. I am proficient in* ***Linux, MacOS*** *and* ***Windows*** *environments and focused on transforming complex technical requirements into functional, stable solutions.*

FUNCTIONAL EXPERTISE

- **Full-Stack Development**
- **Node.js API Architecture**
- **React & UI Engineering**
- **Database & Data Modeling**
- **API Integration & Debugging**
- **Performance Optimization**

PROFESSIONAL EXPERIENCE

SENDANOR| 2023 – 2024

Software firm (FR/FI) specialized in scalable backend architectures.

Full-Stack Developer: Engineered secure Node.js/PHP backend services for international platforms, focusing on high availability and system stability. Refactored data flows to reduce API latency and resolved complex integration bugs to ensure seamless cross-border synchronization.

Tech: Node.js, PHP, PostgreSQL, GitHub, Windows.

NETRI | 2021 – 2023

Neuroscience research lab focused on brain-on-chip technology.

Full-Stack Developer: Built React/Vue.js dashboards for neuroscience data visualization and developed a custom tool generating structured JSON schemas to automate laboratory production. Managed full-stack internal tools and network stability to ensure zero downtime for critical lab operations.

Tech: React, Vue.js, JSON Schema, GitLab, Linux (Dual-boot Ubuntu).

FREELANCE | 2022 – Present

Independent development services for e-commerce, SaaS startups, and digital branding. **Full-Stack Developer & UI/UX Designer:** Architected and deployed scalable TypeScript/React applications for 5+ diverse clients, from technical architecture to UI design. Developed robust REST APIs with secure authentication and designed UI/UX patterns in Figma to maximize user engagement.

Tech: TypeScript, React, Node.js, MongoDB, GitHub, Linux (VirtualBox/Ubuntu).
